

Front of Room

Basic Stage & Sound System Layout for a Too Live Nurse Performance.

(Note: Not Drawn to Scale!)

What is needed for the performance area:

- 1) 16 ft. (width) by 24 ft. (length) stage
(Minimal Length = 16 ft.)
- 2) 16 ft. (width) by 10 ft. (length) Pipe and Drape area.
(This is the min. size)
- 3) Two sets of stairs to the stage.
(One set of stairs between stage and Pipe and Drape area.)
- 4) **One to two wheel chairs for the performance.**
- 5) **For the pipe and drape area: 1 table and 1 clothes rack.**

What is needed for the sound system:

- 1) Use of the House Sound System
(speakers, amps, outlets, cables, etc.)
- 2) Three cordless lavelier microphones for performance.
- 3) One regular hand-held microphone and Microphone stand near the Sound Booth Area.
- 4) One good-quality CD player
(Must have pause capabilities between tracks!)
- 5) One multi-channel mixing board
(To handle all microphones, CD player and send signal to the main house sound system AND monitor speakers.)
- 6) One pair of monitor speakers on stage
(To handle music from CD player only
No microphone signals will be sent to monitor speakers)
- 7) One amplifier to power the monitor speakers.
- 8) All appropriate sound-system cables and patch cords.
- 9) **One small table for the "Sound Booth Area"**

Sound Booth Area

- Table for:**
- 1) **Multi-channel mix board**
 - 2) **CD player**
 - 3) **Receivers for cordless mic's**

(Note: The Sound Booth can be located on the left or right side of the room. Will need access to electrical outlets and audio inputs to the room's sound system.)
